TO WHOM IT MAY CONCERN.

Re -Kamila Katarzyna Glebocka Student number 108321

Kamila attended our Veterinary Hospital from 29th August until 20th September, 2016.

Our practice is a mixed animal practice where we attend to domestic animals as well as beef and dairy cattle, horses, goats. Surgery and medical treatment of dogs and cats.

During Kamila's month at GVH she assisted with pregnancy testing with dairy herds (40-50 cow s), cow dystokias including uterine torsion , percutaneous embryotomy, and live assisted dystokiadeliveries. General physical examination of dairy and beef cows . Surgery for cancer eyes in Friesian dairy cows and in Hereford cross cows requiring third eyelid excision . Surgical correction for LDA by left celiotomy and omentopexy . Acute bloat due to clover pasture ingestion .Severe peracute mastitis . Semen collection from bull . Lameness due to interdigital pododermatitis and digital dermatitis. Dehorning of yearling stock. Surgical detiting in adult cows with supranumery teats. Goat and cow hoof trimming with power grinder . Aged horse with neurological ataxia/lameness which was euthanased . Equine distal limb injuries- canon laceration . Physical examination of obtunded hosre with mention of Hendravirus possibility. Rectal melanoma in aged grey mare .

Theileriosis orientalis in dairy cows recently introduced to district from area that does not have endemic Theileriosis.

Small animal experience included assisting in acranial cruciate repair using the Securos technique as well as partial meniscectomy , liver biopsy in dog , lymphoma in a German Shepherd, caesarean on bitch with dead oeverdue pups, oovhysterectomies in both dogs and cats , castration of dogs and cats , tick paralysis in cats and dog, canine cardiomyopathy management , ultrasound examination (numerous) , dental extractions(many) , blood transfusion and cross matching in canine, radiographs (many) , casts application in distal limb fractures. Ulcerative sebaceous gland cysts on tail of Malamute dog . Multiple general gaseous anaesthetic using isoflurane in both NRB and circle systems. Abdominal cryporchid castration . Doppler blood pressure in blind cat .Microchipping animals and vaccinations for dogs and cats . Parasite preventative advise for cats and dogs with reference in particular to paralysis tick . Ear mites in pups.

This work experience was arranged by Kamila through a friend of her family who is a client of our practice
